1. Snippet d'exercice

```
package main

import "fmt"

func main() {

    var test = "Michel";

    nom := "Christophe";

    tableau := [3]string{test, nom, "Paul"}

    age := map[string]string{
        tableau[0]: "22",
        tableau[1]: "24",
        tableau[2]: "18",
    }

    if i := 10; i > 0 {
        tableau[0] = "42"
    }

    fmt.Println("Salut,",
        test + " (" + age["Michel"] + " ans),",
        nom + " (" + age[nom] + " ans) ainsi que",
        tableau[2])
}
```
